Migration Information and Restrictions		
Compliance with overall migration limit	Overall migration is below 10 mg dm <sup>-2</sup> under standard testing conditions laid down under German Recommendation, BfR No. XXI.	
Specific migration limits (SMLs)		
The determination of specific migration was performed on the finished article. According to the test result, no significant migration could be identified.		
Individual Substances	Specific migration Limits (SMLs)	Test results
Acrylonitrile	0.01 mg/kg	<0.01 mg/kg
Butadiene	0.01 mg/kg	<0.01 mg/kg
Dual Use Substances		
This article may contain one or more dual use substances, not expected to migrate at any significant level from the finished product. Please contact Kimberly-Clark if you wish to obtain further compositional information, subject to a non-disclosure agreement.		
Conditions of use		
<ul style="list-style-type: none"><li>Type(s) of food with which it is intended to be put in contact: All foods.</li><li>Time and temperature and storage while in contact with the food: Room temperature: 20°C (68°F) for up to 10 minutes.</li><li>The food contact surface area to volume ratio use to establish the compliance of the article: The compliance testing was done under conditions set out in German Recommendations BfR No. XXI (as amended) using a surface to volume (s/v) contact ratio 8.4 dm<sup>2</sup> / 5 kg.</li></ul>		
Functional Barrier		
There is no functional barrier present.
